Kelly-Ex. 6 - Personal Privacy lives in Dimock and I talked to her and 18 of the residents last week, I suggest you call her back and see what is up. She has been getting bottled water and will no longer since they have not agreed to have a methane removal system installed in their home...That is the only sure way to get it out, but they don't really want to hear that, they want their water restored to how it was...I wish that was possible

Karen D. Johnson, Chief

Ground Water & Enforcement Branch

Subject: Methane in Drinking Water

Hi Karen,

Becky received a phone call from a Pennsylvania resident on Tuesday 11/22 when I was not in the office. The resident requested to speak with a methane "expert" in drinking water. Can someone on your staff handle this call? If you would prefer, I can call the resident and get some background information. Just let me know. Thanks!

Kelly
